Java Statistical Classes

JSC   Terms of use

This page specifies the terms and conditions that govern your use of this website and the software it provides (purchased software will be further governed by terms set out in an end-user licence).

Please read these terms carefully. By accessing or using the site, you agree to be bound by these terms set forth below. If you do not agree to all of these terms, please do not use this website. The author (A. J. Bertie) may modify these terms at any time, and such modifications shall be effective immediately upon posting of the modified terms on this site. You are expected to review the terms periodically to be aware of such modifications and your continued access or use of this site shall be deemed your conclusive acceptance of the modified terms.

Disclaimer

The author accepts no legal responsibility whatsoever for the use of the *JSC* library, or any other free software on this site, by other parties; and makes no guarantees, expressed or implied, about its quality, reliability, or any other characteristic. The software is provided "as is" and its author makes no guarantees that the software is without bugs, or that it will run on any particular platform.

The *JSC* library is incomplete and still under construction. The author reserves the right to restructure *JSC*; change, withdraw or rename any of its classes or interfaces as he sees fit, without notice.

The *JSC* library, or any other software on this site, is not designed or intended for use in on-line control of aircraft, air traffic, aircraft navigation or aircraft communications; or in the design, construction, operation or maintenance of any nuclear facility; or for any other safety-critical application. You must not use or redistribute the software for such purposes.

Although the site invites emailed questions, comments, bug reports, requests etc., the author does not guarantee to always respond to such communications.

The author makes reasonable efforts to protect the integrity of his computer files. However, there is always a risk attached to downloading files from the Internet. Please ensure that anything downloaded is virus-checked. The author accepts no liability for any loss or damage caused by the downloading of files from this site or their use. You assume all risk for any damage to your computer system or loss of data that results from obtaining any content or software from this website, including any damages resulting from computer viruses.

The author cannot guarantee that this website's links to other resources on the Internet are always current or working. The author is not responsible for the content of external sites and provision of a link should not be taken as endorsement of any kind. The inclusion of any company's name within this website's pages should not be construed as an endorsement of that company's products and/or services.

Intellectual property rights

This site and all the software it provides are copyright © Andrew James Bertie, 2004, unless otherwise indicated. You must not remove or modify any copyright or trademark notice, or other notice of ownership, from the software. Acknowledgement of A. J. Bertie's copyright, authorship and permission must appear with any permitted reuse of this site's content or software. This includes any applications you develop using the *JSC* library, or extensions of it.

The *JSC* library, applets or any other software downloaded for free from this site cannot be leased, sold or otherwise used for commercial gain without the express permission of the author. This prohibition includes large scale or fee paying educational use.

You are permitted to extend and reuse the *JSC* library through the usual Java object-orientated mechanisms of inheritance, composition and access provided to classes, interfaces, packages etc. by the *JSC* application programming interface which is documented on this site at API. However, you must not modify, take apart, decompile, or reverse engineer the original *JSC* library. The author is willing, however, to consider making useful modifications to the *JSC* API if requested.
